Introduction to Plant Biotechnology (3/e) H S Chawla

This book has been written to meet the needs of students for biotechnology courses at various levels of undergraduate and graduate studies. This book covers all the important aspects of plant tissue culture viz. nutrition media, micropropagation, organ culture, cell suspension culture, haploid culture, protoplast isolation and fusion, secondary metabolite production, somaclonal variation and cryopreservation. For good understanding of recombinant DNA technology, chapters on genetic material, organization of DNA in the genome and basic techniques involved in recombinant DNA technology have been added. Different aspects on rDNA technology covered gene cloning, isolation of plant genes, transposons and gene tagging, in vitro mutagenesis, PCR, molecular markers and marker assisted selection, gene transfer methods, chloroplast and mitochondrion DNA transformation, genomics and bioinformatics. Genomics covers functional and structural genomics, proteomics, metabolomics, sequencing status of different organisms and DNA chip technology. Application of biotechnology has been discussed as transgenics in crop improvement and impact of recombinant DNA technology mainly in relation to biotech crops.

From reader reviews:

Enrique Flora:

Now a day individuals who Living in the era everywhere everything reachable by connect to the internet and the resources inside can be true or not require people to be aware of each info they get. How a lot more to be smart in getting any information nowadays? Of course the solution is reading a book. Studying a book can help people out of this uncertainty Information especially this Introduction to Plant Biotechnology (3/e) book because this book offers you rich data and knowledge. Of course the information in this book hundred per-cent guarantees there is no doubt in it everybody knows.

Melissa Conner:

The e-book with title Introduction to Plant Biotechnology (3/e) has a lot of information that you can discover it. You can get a lot of benefit after read this book. This particular book exist new expertise the information that exist in this publication represented the condition of the world right now. That is important to yo7u to know how the improvement of the world. This particular book will bring you with new era of the the positive effect. You can read the e-book on your own smart phone, so you can read the idea anywhere you want.

Johnnie Lewis:

The reason why? Because this Introduction to Plant Biotechnology (3/e) is an unordinary book that the inside of the book waiting for you to snap the item but latter it will surprise you with the secret it inside. Reading this book beside it was fantastic author who else write the book in such incredible way makes the content interior easier to understand, entertaining means but still convey the meaning completely. So , it is good for you for not hesitating having this ever again or you going to regret it. This unique book will give you a lot of benefits than the other book have such as help improving your expertise and your critical thinking method. So , still want to hesitate having that book? If I ended up you I will go to the publication store hurriedly.

Katrina Varga:

Many people said that they feel uninterested when they reading a publication. They are directly felt the item when they get a half elements of the book. You can choose the particular book Introduction to Plant Biotechnology (3/e) to make your reading is interesting. Your personal skill of reading ability is developing when you similar to reading. Try to choose straightforward book to make you enjoy to study it and mingle the sensation about book and looking at especially. It is to be very first opinion for you to like to available a book and examine it. Beside that the e-book Introduction to Plant Biotechnology (3/e) can to be your brand new friend when you're sense alone and confuse with the information must you're doing of these time.
