Transcendental and Algebraic Numbers (Dover Books on Mathematics)

A. O. Gelfond

Transcendental and Algebraic Numbers (Dover Books on Mathematics) A. O. Gelfond

Primarily an advanced study of the modern theory of transcendental and algebraic numbers, this treatment by a distinguished Soviet mathematician focuses on the theory's fundamental methods. The text also chronicles the historical development of the theory's methods and explores the connections with other problems in number theory. The problem of approximating algebraic numbers is also studied as a case in the theory of transcendental numbers.

Topics include the Thue-Siegel theorem, the Hermite-Lindemann theorem on the transcendency of the exponential function, and the work of C. Siegel on the transcendency of the Bessel functions and of the solutions of other differential equations. The final chapter considers the Gelfond-Schneider theorem on the transcendency of α to the power β . Each proof is prefaced by a brief discussion of its scheme, which provides a helpful guide to understanding the proof's progression.

From reader reviews:

Donald Farrell:

Why don't make it to become your habit? Right now, try to prepare your time to do the important take action, like looking for your favorite publication and reading a publication. Beside you can solve your short lived problem; you can add your knowledge by the guide entitled Transcendental and Algebraic Numbers (Dover Books on Mathematics). Try to make the book Transcendental and Algebraic Numbers (Dover Books on Mathematics) as your buddy. It means that it can to get your friend when you sense alone and beside that course make you smarter than before. Yeah, it is very fortunated to suit your needs. The book makes you more confidence because you can know anything by the book. So , let us make new experience as well as knowledge with this book.

William Emmer:

Reading a publication can be one of a lot of activity that everyone in the world really likes. Do you like reading book thus. There are a lot of reasons why people like it. First reading a publication will give you a lot of new details. When you read a reserve you will get new information simply because book is one of many ways to share the information or even their idea. Second, examining a book will make a person more imaginative. When you reading through a book especially fiction book the author will bring that you imagine the story how the personas do it anything. Third, you may share your knowledge to other people. When you read this Transcendental and Algebraic Numbers (Dover Books on Mathematics), you are able to tells your family, friends along with soon about yours publication. Your knowledge can inspire others, make them reading a book.

Katherine Humphrey:

Precisely why? Because this Transcendental and Algebraic Numbers (Dover Books on Mathematics) is an unordinary book that the inside of the guide waiting for you to snap it but latter it will distress you with the secret the item inside. Reading this book next to it was fantastic author who also write the book in such remarkable way makes the content inside of easier to understand, entertaining approach but still convey the meaning entirely. So , it is good for you for not hesitating having this any more or you going to regret it. This book will give you a lot of advantages than the other book get such as help improving your skill and your critical thinking approach. So , still want to delay having that book? If I had been you I will go to the publication store hurriedly.

Jane Kim:

Don't be worry for anyone who is afraid that this book will probably filled the space in your house, you can have it in e-book approach, more simple and reachable. This specific Transcendental and Algebraic Numbers (Dover Books on Mathematics) can give you a lot of good friends because by you looking at this one book you have matter that they don't and make a person more like an interesting person. This particular book can

be one of one step for you to get success. This guide offer you information that might be your friend doesn't learn, by knowing more than some other make you to be great people. So , why hesitate? We should have Transcendental and Algebraic Numbers (Dover Books on Mathematics).
