**Australia's Biodiversity and Climate Change** Will Steffen, A.A. Burbidge, L. Hughes, R. Kitching, D. Lindenmayer, W. Musgrave, M. Stafford-Smith, P. A. Werner

This book provides a strategic assessment of the vulnerability of Australia's biodiversity (primarily terrestrial) to climate change and suggests ways that policy and management can deal with the threats to biodiversity associated with climate change.

It begins with a long-time perspective on the evolution of Australia's biota—why Australia is so species-rich, why its biodiversity is unique, and why the conservation of this biodiversity is so important. It goes on to describe the two centuries of acute change since European settlement—the ultimate drivers of current changes in Australia's biodiversity and the observed changes in diversity at the genetic, species and ecosystem levels.

The discussion of climate change itself is organized around the global and the Australian scales, describing the climate changes that have already been observed over the last one to two centuries and outlining the range of projections for Australia for the rest of this century. The ways in which climate change is already affecting Australia's biota and will potentially affect it in future are described in considerable detail.

The book then focuses strongly on how to reduce the vulnerability of Australia's biodiversity to climate change, beginning with a description of current management principles, and an analysis of the current set of conservation strategies and tools and the current policy and institutional landscape for biodiversity conservation. Building on a set of fundamental ecological principles, the focus then shifts to ways in which adaptive capacity can be enhanced—modified and new management approaches, innovative governance systems and a much larger resource base. Finally, a set of five key messages and policy directions pulls together the major conclusions arising from the assessment.

**From reader reviews:**

**Lea Severino:**

With other case, little individuals like to read book Australia's Biodiversity and Climate Change. You can choose the best book if you want reading a book. Provided that we know about how is important some sort of book Australia's Biodiversity and Climate Change. You can add information and of course you can around the world with a book. Absolutely right, due to the fact from book you can learn everything! From your country until eventually foreign or abroad you will end up known. About simple factor until wonderful thing you could know that. In this era, we are able to open a book or perhaps searching by internet product. It is called e-book. You can utilize it when you feel uninterested to go to the library. Let's study.

**Howard Foster:**

Often the book Australia's Biodiversity and Climate Change will bring one to the new experience of reading the book. The author style to explain the idea is very unique. When you try to find new book to read, this book very acceptable to you. The book Australia's Biodiversity and Climate Change is much recommended to you you just read. You can also get the e-book from official web site, so you can easier to read the book.

**Florinda Redfern:**

Playing with family in the park, coming to see the coastal world or hanging out with pals is thing that usually you will have done when you have spare time, then why you don't try matter that really opposite from that. One activity that make you not feeling tired but still relaxing, trilling like on roller coaster you are ride on and with addition info. Even you love Australia's Biodiversity and Climate Change, you may enjoy both. It is excellent combination right, you still wish to miss it? What kind of hang-out type is it? Oh seriously its mind hangout men. What? Still don't understand it, oh come on its named reading friends.

**Micheal Goggin:**

That e-book can make you to feel relax. This kind of book Australia's Biodiversity and Climate Change was colorful and of course has pictures on the website. As we know that book Australia's Biodiversity and Climate Change has many kinds or style. Start from kids until teens. For example Naruto or Investigation company Conan you can read and believe you are the character on there. Therefore , not at all of book usually are make you bored, any it can make you feel happy, fun and relax. Try to choose the best book for yourself and try to like reading that.
