Raspberry Pi Projects for Kids Daniel Bates

Start your own coding adventure with your kids by creating cool and exciting games and applications on the Raspberry Pi

About This Book

- Learn how to use your own Raspberry Pi device to create your own applications, including games, interactive maps, and animations
- Become a computer programmer by using the Scratch and Python languages to create all sorts of cool applications and games
- Get hands-on with electronic circuits to turn your Raspberry Pi into a nifty sensor

Who This Book Is For

If you are someone with a big imagination and would like to dive straight into the realm of technology and computers, then this is the book for you. With only a Raspberry Pi and no prior experience required, you will be shown how to translate your ideas into computer programs, creating any game, tool, or animation you can dream of.

What You Will Learn

- Learn how to set up your own Raspberry Pi device
- Explore the world of programming by learning about Scratch and Python
- Program with Scratch to develop your own version of Angry Birds
- Get hands-on with some electronics to build your own reaction game
- Develop with Python in order to build your own version of Google Maps

In Detail

Technology today is growing rapidly, with all sorts of cool gadgets, applications, and games made thanks to the rise of computer programming. The Raspberry Pi is a crafty device that has promoted the teaching of basic computer science in schools, catching the attention of both young and old. Although learning to program offers a unique set of skills that allows you to explore your creative side, it has its own challenges, which may mean you will need a helping hand.

This handy guide will launch you into the world of computer programming by showing you how to build your own amazing applications. Raspberry Pi Projects for Kids contains several awesome projects for you to get hands-on with, including creating your own games, crafting your own simple electronics, and making your own interactive map. By learning how to use Scratch and Python in your programming, you will be a computer scientist in no time!

After you have become comfortable with setting up and playing with your Raspberry Pi, you will be transported into this exciting world of technology, where you will get to grips with using Scratch, Raspberry

Pi's official programming language, in order to develop your own version of Angry Birds! After connecting new circuitry, lights, and switches to your Raspberry Pi, you will then get to use Scratch to create your own reaction game. See for yourself who's the quickest off the mark!) You will finally get to step things up by developing an interactive map of your own hometown using the Python programming language. You will be working for Google before you know it!

This book will teach you everything you need to know about using your Raspberry Pi in order to develop your own games, applications, and electronic circuits. It's time to have your Pi and eat it, because you will be able to create virtually anything you like.

This particular book also makes your own personal vocabulary increase well. That makes it easy to understand then can go to you, both in printed or e-book style are available. We suggest you for having this kind of Raspberry Pi Projects for Kids instantly.

Jenny Perez:

The reason? Because this Raspberry Pi Projects for Kids is an unordinary book that the inside of the reserve waiting for you to snap the item but latter it will distress you with the secret it inside. Reading this book adjacent to it was fantastic author who have write the book in such awesome way makes the content on the inside easier to understand, entertaining approach but still convey the meaning thoroughly. So , it is good for you because of not hesitating having this nowadays or you going to regret it. This unique book will give you a lot of advantages than the other book have such as help improving your ability and your critical thinking technique. So , still want to hold up having that book? If I were being you I will go to the e-book store hurriedly.

Thomas Smith:

As a university student exactly feel bored to help reading. If their teacher inquired them to go to the library or even make summary for some publication, they are complained. Just little students that has reading's internal or real their hobby. They just do what the teacher want, like asked to the library. They go to there but nothing reading really. Any students feel that looking at is not important, boring as well as can't see colorful photographs on there. Yeah, it is to be complicated. Book is very important for yourself. As we know that on this era, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. Therefore this Raspberry Pi Projects for Kids can make you experience more interested to read.
