Britain and Europe since 1945: Historiographical perspectives on integration Oliver J. Daddow

This important book offers a refreshing and challenging perspective on the nature of history by analysing the character, role, functioning and wider uses of historiography. Taking British policies towards European integration since the Second World War as a case study, the author demonstrates how its interpretation and reportage over time is subject to changing trends. Seeking to explain these trends in terms of the different conceptions of the past which are maintained by different schools of writing, it forces us to confront the fundamental difficulties we encounter in undertaking studies in history. It draws attention to the impact on historical interpretation of changing times, political discourse, the opening of archives, and of subjects being brought to the fore by professional historians.
