Challenges for Next Generation Network Operations and Service Management: 11th Asia-Pacific Network Operations and Management Symposium, APNOMS 2008, ... Networks and Telecommunications)

We are delighted to present the proceedings of the 11 Asia-Pacific Network Operations and Management Symposium (APNOMS 2008) which was held in Beijing, China, during October 22–24, 2008. The Organizing Committee (OC) selected the theme of this year's symposium as "Challenges for Next-Generation Network Operations and Service Management." Research and development on next-generation networks (NGNs) have been carried out over the last few years and we are already seeing their deployment and operations in many parts of Asia-Pacific countries. We are also beginning to experience new and interesting services that utilize these NGNs. We are certain that we will see more deployment of NGNs and NGN services in the next few years. Thus, the operations and management of NGNs and their services are very important to the network operators and service providers. At the same time, they are also concerned about new and more effective ways of performing the operations and management. This year, the APNOMS call for papers received 195 paper submissions from 19 different countries, including countries outside the Asia-Pacific region (Europe, Middle-East, North and South America). Each paper was carefully reviewed by at least three international experts. Based on review scores, the APNOMS 2008 Technical Program Committee discussed the selection of papers, and selected 43 high-quality papers (22.1% of submissions) as full papers and 34 papers as short papers. Accepted papers were arranged into ten technical sessions and two short paper sessions (poster presentation).

Barbara Norwood:

Reading a book to be new life style in this calendar year; every people loves to examine a book. When you read a book you can get a lot of benefit. When you read textbooks, you can improve your knowledge, mainly because book has a lot of information on it. The information that you will get depend on what kinds of book that you have read. If you wish to get information about your review, you can read education books, but if you want to entertain yourself you can read a fiction books, this sort of us novel, comics, as well as soon. The Challenges for Next Generation Network Operations and Service Management: 11th Asia-Pacific Network Operations and Management Symposium, APNOMS 2008, ... Networks and Telecommunications) will give you new experience in studying a book.

Sandra Romero:

As a student exactly feel bored in order to reading. If their teacher questioned them to go to the library or to make summary for some book, they are complained. Just minor students that has reading's internal or real their hobby. They just do what the educator want, like asked to go to the library. They go to presently there but nothing reading seriously. Any students feel that studying is not important, boring and also can't see colorful images on there. Yeah, it is to become complicated. Book is very important for you personally. As we know that on this age, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. Therefore this Challenges for Next Generation Network Operations and Service Management: 11th Asia-Pacific Network Operations and Management Symposium, APNOMS 2008, ... Networks and Telecommunications) can make you really feel more interested to read.
