Statistical Tools for Epidemiologic Research

Steve Selvin

Statistical Tools for Epidemiologic Research Steve Selvin

In this innovative new book, Steve Selvin provides readers with a clear understanding of intermediate biostatistical methods without advanced mathematics or statistical theory (for example, no Bayesian statistics, no causal inference, no linear algebra and only a slight hint of calculus). This text answers the important question: After a typical first-year course in statistical methods, what next?

Statistical Tools for Epidemiologic Research thoroughly explains not just how statistical data analysis works, but how the analysis is accomplished. From the basic foundation laid in the introduction, chapters gradually increase in sophistication with particular emphasis on regression techniques (logistic, Poisson, conditional logistic and log-linear) and then beyond to useful techniques that are not typically discussed in an applied context. Intuitive explanations richly supported with numerous examples produce an accessible presentation for readers interested in the analysis of data relevant to epidemiologic or medical research.

From reader reviews:

Alex Jose:

The book Statistical Tools for Epidemiologic Research can give more knowledge and also the precise product information about everything you want. So why must we leave a good thing like a book Statistical Tools for Epidemiologic Research? A few of you have a different opinion about guide. But one aim in which book can give many info for us. It is absolutely proper. Right now, try to closer together with your book. Knowledge or facts that you take for that, you could give for each other; you can share all of these. Book Statistical Tools for Epidemiologic Research has simple shape however, you know: it has great and big function for you. You can seem the enormous world by open up and read a guide. So it is very wonderful.

Angela Yoder:

Reading a publication can be one of a lot of exercise that everyone in the world adores. Do you like reading book and so. There are a lot of reasons why people enjoy it. First reading a e-book will give you a lot of new data. When you read a book you will get new information due to the fact book is one of a number of ways to share the information as well as their idea. Second, reading through a book will make you more imaginative. When you examining a book especially fictional book the author will bring one to imagine the story how the character types do it anything. Third, you could share your knowledge to some others. When you read this Statistical Tools for Epidemiologic Research, you are able to tells your family, friends and soon about yours reserve. Your knowledge can inspire different ones, make them reading a publication.

David Clark:

This Statistical Tools for Epidemiologic Research is great publication for you because the content which is full of information for you who all always deal with world and have to make decision every minute. That book reveal it facts accurately using great arrange word or we can state no rambling sentences inside it. So if you are read the idea hurriedly you can have whole data in it. Doesn't mean it only provides you with straight forward sentences but tricky core information with wonderful delivering sentences. Having Statistical Tools for Epidemiologic Research in your hand like getting the world in your arm, facts in it is not ridiculous 1. We can say that no e-book that offer you world within ten or fifteen tiny right but this guide already do that. So , this is certainly good reading book. Heya Mr. and Mrs. occupied do you still doubt in which?

Tia Rosario:

Is it a person who having spare time after that spend it whole day by means of watching television programs or just resting on the bed? Do you need something totally new? This Statistical Tools for Epidemiologic Research can be the respond to, oh how comes? The new book you know. You are thus out of date, spending your extra time by reading in this brand-new era is common not a nerd activity. So what these guides have than the others?
