Sabkha Ecosystems: Volume IV: Cash Crop Halophyte and Biodiversity Conservation (Tasks for Vegetation Science)

Sustainable development is the key for the survival in 21st century. The natural resources are finite and cannot be used with impunity because we are the custodian of these resources and have responsibility to pass these to the next generation. This monumental task requires several major commitments and most important of them is to arrest population explosion which has already reached seven billion. Natural resources like air to breath, food to eat, and water to drink, and fossil fuel to maintain this life style are being overexploited. Unrestrained consuming culture will accelerate undesired situation. This situation will have more dire consequences in resource limited ecosystems like dry lands. Given the severe scarcity of water, ever increasing population and soil salinization out of the box solutions for the provision of food and clean energy is required to spare meager fresh water resources for conventional agriculture. This volume contains a number of articles dealing with halophyte ecology, bio-geography, ecophysiology, hyper-saline soils, biofuels, biosaline agriculture, biosaline landscaping, climate change mitigation, and biodiversity. It also contains the communication of innovative ideas, such as the research into floating mangroves, seagrass terraces, as well as a World Halophyte Garden containing all known salt-tolerant plant species. It is hoped that the information provided will not only advance vegetation science, but that it will truly generate more interdisciplinarity, networking, awareness, and inspire farmers, and agricultural and landscaping stakeholders to seriously engage in halophyte cash crop production in coastal hyper-saline areas.

From reader reviews:

Carol Sage:

The book Sabkha Ecosystems: Volume IV: Cash Crop Halophyte and Biodiversity Conservation (Tasks for Vegetation Science) can give more knowledge and also the precise product information about everything you want. So just why must we leave a very important thing like a book Sabkha Ecosystems: Volume IV: Cash Crop Halophyte and Biodiversity Conservation (Tasks for Vegetation Science)? Wide variety you have a different opinion about reserve. But one aim that book can give many details for us. It is absolutely proper. Right now, try to closer with your book. Knowledge or details that you take for that, it is possible to give for each other; it is possible to share all of these. Book Sabkha Ecosystems: Volume IV: Cash Crop Halophyte and Biodiversity Conservation (Tasks for Vegetation Science) has simple shape however you know: it has great and large function for you. You can appear the enormous world by open up and read a guide. So it is very wonderful.

Gregorio Leslie:

What do you regarding book? It is not important with you? Or just adding material when you really need something to explain what the ones you have problem? How about your free time? Or are you busy person? If you don't have spare time to perform others business, it is gives you the sense of being bored faster. And you have time? What did you do? All people has many questions above. They must answer that question mainly because just their can do in which. It said that about reserve. Book is familiar on every person. Yes, it is correct. Because start from on guardería until university need that Sabkha Ecosystems: Volume IV: Cash Crop Halophyte and Biodiversity Conservation (Tasks for Vegetation Science) to read.

James Rodriguez:

Reading a guide can be one of a lot of exercise that everyone in the world really likes. Do you like reading book so. There are a lot of reasons why people love it. First reading a guide will give you a lot of new data. When you read a e-book you will get new information mainly because book is one of various ways to share the information or perhaps their idea. Second, studying a book will make an individual more imaginative. When you reading a book especially hype book the author will bring that you imagine the story how the people do it anything. Third, you can share your knowledge to other individuals. When you read this Sabkha Ecosystems: Volume IV: Cash Crop Halophyte and Biodiversity Conservation (Tasks for Vegetation Science), you can tells your family, friends along with soon about yours publication. Your knowledge can inspire different ones, make them reading a publication.

Ernesto Harrell:

Don't be worry when you are afraid that this book may filled the space in your house, you may have it in e-book way, more simple and reachable. This kind of Sabkha Ecosystems: Volume IV: Cash Crop Halophyte and Biodiversity Conservation (Tasks for Vegetation Science) can give you a lot of close friends because by

you taking a look at this one book you have point that they don't and make an individual more like an interesting person. This kind of book can be one of a step for you to get success. This publication offer you information that probably your friend doesn't learn, by knowing more than different make you to be great individuals. So , why hesitate? We should have Sabkha Ecosystems: Volume IV: Cash Crop Halophyte and Biodiversity Conservation (Tasks for Vegetation Science).
