Climate Change: Improvements Needed to Clarify National Priorities and Better Align Them With Federal Funding Decisions U.S. Government Accountability Office

GAO-11-317. Climate change poses risks to many environmental and economic systems, including agriculture, infrastructure, and ecosystems. Federal law has periodically required the Office of Management and Budget (OMB) to report on federal climate change funding. GAO was asked to examine (1) federal funding for climate change activities and how these activities are organized; (2) the extent to which methods for defining and reporting climate change funding are interpreted consistently across the federal government; (3) federal climate change strategic priorities, and the extent to which funding is aligned with these priorities; and (4) what options, if any, are available to better align federal climate change funding with strategic priorities. GAO analyzed OMB funding reports and responses to a Web-based questionnaire sent to federal officials, reviewed available literature, and interviewed stakeholders. Funding for climate change activities reported by OMB increased from \$4.6 billion in 2003 to \$8.8 billion in 2010, and is organized in a complex, crosscutting system. OMB reports funding in four categories: technology to reduce emissions, science to better understand climate change, international assistance for developing countries, and wildlife adaptation to respond to actual or expected changes. Over this period, technology funding, the largest category, increased from \$2.56 billion to \$5.5 billion and increased as a share of total funding. OMB also reported \$26.1 billion as funding for climate change programs and activities in the American Recovery and Reinvestment Act of 2009, and tax expenditures to encourage emissions reductions, with \$7.2 billion in federal revenue losses in 2010. Many federal entities manage related activities, including interagency programs that coordinate agency actions. Questionnaire responses suggest that methods for defining and reporting climate change funding are not interpreted consistently across the federal government. Respondents identified three methods for defining and reporting climate change funding, foremost of which is guidance contained in OMB Circular A-11. While most said their own organization consistently applied these methods internally, far fewer said that they were applied consistently across the government. Some, for example, noted that other agencies use their own interpretation of definitions, resulting in inconsistent accounting across the government, because of several factors, such as the difficulty in distinguishing between programs related and unrelated to climate change. Respondents, literature, and stakeholders identified two key factors that complicate efforts to align funding with priorities. First, notwithstanding existing coordinating mechanisms, questionnaire results indicated that federal officials do not have a shared understanding of strategic priorities. Second, respondents indicated that since mechanisms for aligning funding with priorities are nonbinding, they are limited when in conflict with agencies' own priorities. Among GAO's recommendations are that the appropriate entities within the Executive Office of the President (EOP), in consultation with Congress, clearly establish federal strategic climate change priorities and assess the effectiveness of current practices for defining and reporting related funding. Relevant EOP entities did not provide official written comments, but instead provided technical comments, which GAO incorporated as appropriate.~

From reader reviews:

Hyacinth Mills:

The book Climate Change: Improvements Needed to Clarify National Priorities and Better Align Them With Federal Funding Decisions can give more knowledge and also the precise product information about everything you want. Why must we leave a good thing like a book Climate Change: Improvements Needed to Clarify National Priorities and Better Align Them With Federal Funding Decisions? Wide variety you have a different opinion about e-book. But one aim in which book can give many facts for us. It is absolutely right. Right now, try to closer using your book. Knowledge or info that you take for that, you are able to give for each other; it is possible to share all of these. Book Climate Change: Improvements Needed to Clarify National Priorities and Better Align Them With Federal Funding Decisions has simple shape but the truth is know: it has great and massive function for you. You can appear the enormous world by open and read a guide. So it is very wonderful.

Leonel Burton:

This book untitled Climate Change: Improvements Needed to Clarify National Priorities and Better Align Them With Federal Funding Decisions to be one of several books that will best seller in this year, this is because when you read this book you can get a lot of benefit upon it. You will easily to buy this specific book in the book store or you can order it by using online. The publisher of this book sells the e-book too. It makes you easier to read this book, since you can read this book in your Smartphone. So there is no reason for you to past this reserve from your list.

Rebecca Beal:

Playing with family in a very park, coming to see the marine world or hanging out with pals is thing that usually you will have done when you have spare time, and then why you don't try matter that really opposite from that. One particular activity that make you not experience tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of knowledge. Even you love Climate Change: Improvements Needed to Clarify National Priorities and Better Align Them With Federal Funding Decisions, you may enjoy both. It is great combination right, you still desire to miss it? What kind of hang type is it? Oh can happen its mind hangout people. What? Still don't obtain it, oh come on its referred to as reading friends.

Stacey Greene:

This Climate Change: Improvements Needed to Clarify National Priorities and Better Align Them With Federal Funding Decisions is great guide for you because the content which can be full of information for you who also always deal with world and still have to make decision every minute. This kind of book reveal it info accurately using great arrange word or we can point out no rambling sentences inside. So if you are

read it hurriedly you can have whole info in it. Doesn't mean it only gives you straight forward sentences but tricky core information with beautiful delivering sentences. Having Climate Change: Improvements Needed to Clarify National Priorities and Better Align Them With Federal Funding Decisions in your hand like getting the world in your arm, data in it is not ridiculous a single. We can say that no book that offer you world with ten or fifteen tiny right but this guide already do that. So , it is good reading book. Heya Mr. and Mrs. stressful do you still doubt this?
